

This listing of claims replaces all prior versions, and listings, of claims in this application.

Listing of Claims:

1. (Currently Amended) A wireless communication system providing interactive voice response for prepaid wireless services comprising:

a mobile switching system, adapted to communicate with at least one wireless device, capable of establishing a control channel and a voice channel with the wireless device;

a Service Control Point ("SCP") ~~an SCP~~ in communication with the mobile switching system, the SCP including an Interactive Voice Response ("IVR") ~~IVR~~ application for prepaid customers, and capable of retrieving customer information;

an Intelligent Peripheral in communication with the SCP and the mobile switching system, the Intelligent Peripheral including IVR messages and adapted to send those messages through a voice channel to the mobile switching system;

wherein the mobile switching system communicates with the SCP and wherein the SCP communicates with the Intelligent Peripheral.

2. (Original) The wireless communications system according to claim 1, wherein the system is adapted to route a calling party to the IVR when the system receives a predetermined dialed number.

3. (Original) The wireless communications system according to claim 2, wherein the predetermined dialed number is an abbreviated number.

4. (Original) The wireless communications system according to claim 2, wherein the predetermined dialed number is an abbreviated number shorter than seven digits.

A1
Cont.

5. (Original) The wireless communications system according to claim 2, wherein the predetermined dialed number is a three digit code.

6. (Original) The wireless communications system according to claim 2, wherein the predetermined dialed number is $x11$, where x is an integer.

7. (Currently Amended) The interactive voice response system according to claim 1, wherein the SCP communicates with the mobile switching system using Intelligent Network Transactional Capabilities Application Part ~~IN-TCAP~~ messaging.

8. (Original) The interactive voice response system according to claim 7, wherein the SCP communicates with the Intelligent Peripheral using TCP/IP.

9. (Currently Amended) The interactive voice response system according to claim 7, wherein the SCP communicates with the Intelligent Peripheral using Intelligent Network Transactional Capabilities Application Part ~~IN-TCAP~~ messaging.

10. (Original) The interactive voice response system according to claim 1, wherein the SCP communicates with the mobile switching system using TCP/IP.

11. (Original) The interactive voice response system according to claim 10, wherein the SCP communicates with an Intelligent Peripheral using TCP/IP.

12. (Currently Amended) The interactive voice response system according to claim 10, wherein the SCP communicates with an Intelligent Peripheral using Intelligent Network Transactional Capabilities Application Part ~~IN-TCAP~~ messaging.

Serial No.: 09/749,833

13. (Original) The interactive voice response system according to claim 1, wherein the
SCP communicates with an Intelligent Peripheral, and wherein the Intelligent Peripheral plays
voice messages through a voice path to the mobile switching system.
